Leadership

AHE.

I was lucky enough to take a part-time position

in the cleaning company where my mother worked. It was a great decision to move from cleaner, to manager, to company owner and then progress to healthcare leadership. I was excited when my contract management company was involved with AHE and I became as active in the membership as I could be.

Leadership

A good leader should allow their teams to be as active as they can be. Never micro-manage or look over shoulders. Set the expectations and let people make you proud.
