

Skill.Set.Go.™ is a training subscription model developed with a focus on supporting EVS professionals and ensuring high-performance disinfection and cleaning. It provides the necessary tools to empower and drive teams with efficiency, confidence and expertise.

The user-friendly interface provides a fun and engaging way to understand the science behind much of today's critical disinfection methods. Technicians will explore key concepts that can save lives and increase productivity to ultimately help control costs and increase survey readiness. Skill.Set.Go. is powered by the Association for the Health Care Environment (AHE) and the American Hospital Association (AHA), a leading authority in the health care field.

EVS team leaders/administrators can bolster frontline staff and technicians by uncovering and addressing critical gaps in knowledge. Mastery of important EVS topics are assured through easy-to-access reports, printable certificates and an online dashboard. Training programs will actively expand and evolve based on subscriber needs.

Testimonials:

"We love Skill.Set.Go. for team member training. The dashboard is a great way to track the team's learning progress, credits and certificates."

Mark Meehan

Manager of Environmental Services

"Skill.Set.Go. is an amazing resource to help all Etr3

Manager of Environmental Services

"Skill.Set.Go. contained information and techniques that I use daily and helped me recognize the impact my actions have on patient care and hospital staff."

Dear <SUPERVISOR'S NAME>,

x

I am seeking your support for the training subscription Skill.Set.Go.™ to standardize EVS training and protect patients and our organization. This model is focused on building competencies for EVS care teams using science-backed methodologies for disinfection and cleaning. Skill.Set.Go. features interactive and game-based scenarios that allow for training with no supervision required. All lessons have been created by trusted subject matter experts from the Association for the Health Care Environment and the American Hospital Association.

The EVS field faces many challenges, including labor force shortages, budgetary constraints, and the threat of emerging pathogens. Skill.Set.Go. offers a solution to those challenges by standardizing EVS training, enabling us to train and retain talent, and improve efficiencies while centering safety and sustainability.

Our participation in this training subscription model will address our current challenges and needs related to <INSERT OPPORTUNITIES FOR IMPROVEMENT>
